Great Game! nothing else to say its just super fun !. Really cute outfits for the CPUs and Candidates. And Vert's outfit is really skimpy \u00baw\u00ba The only thing I found a bit disappointing is that these outfits hardly fit with other clothes, so if you want to use the pajamas, you'll probably want to use the hat that comes with it. But that isn't really a problem.. Worth it! 7/10. New to VR and still not understand the high cost of unfinished games. I get they need funded to become somewhat better but when the game is released as what feels to be a demo, I lose interest. Maybe when more content is added I'll consider playing again but as of now, keep working on it. Great concept and idea just a lack of everything from gameplay to content. Not many bugs but my AK-47 disappeared through the map twice already which sucked cause I had a pile of mags and no gun.

\$20.00 is not even worth it. Maybe \$5 would suffice.. Like a lot of people say there is nothing like this game. It is clever, makes you be clever - especially on higher difficulties, and makes you properly feel like a spy rather than a murder machine who sometimes finds clues. The random nature of each mission makes it keep feeling like a puzzle. Yes the enemy only chase a few goals but I think it is better to think of it as a puzzle game that hides that fact very well. So crosswords only have so many clues and Sudokus are repedative when it comes down to it but because you are working it out each time it feels fun. It is also great when you realise it isn't truely random and the bits that aren't random make sense (ie if one spy agency is active in a city then check out their dossier and wiretap their allies in the same city).

The minigames make it. Each has its purpose and it's own skill set so find what works best for you as a spy and go for it (wire tap and infiltration for me).

The controls take a bit of getting used to and in some ways it almost feels turn based, that is there is a second between each action for you and the enemies so even if you respond a touch late they do as well.

I am sitting here on a rig in 2018 worth thousands wishing someone would make the next in this series (or just rip it off). Every year or so I come back to this game for a bit more of a play (only recently on steam, hence the short hours). It would make a 50x better mobile game than most of the stuff out there if someone made a mobile version of it.. Tomb Raider is a neat package with few holes and bugs, deserving of its almost perfect score.

The gameplay is what you would expect from an action\adventure title but nothing more. The combat sequences are frequent enough without straying into third person shooter territory - though some may disagree. Choice of weapons is limited compared to the next two entries in the trilogy but enough to keep it interesting.

The standout feature of this game is the attention to story elements. The main narrative is face paced and interesting albeit not groundbreaking. When you take the time to read the collectable documents, however, a richer layer of story is revealed.

do like yes. but miss 2player from BH1.. This was like experiencing a buddy comedy movie, but more gay and romantic. I love the light that it shines on the struggles of not just lesbians, but women in general. It's really powerful, emotional, and adorable. Also, representaiou; \u2665\u2665\u2665\u2665 yeah! The game explains and says more for itself than I could.. Great concept, but seems to be behind the times when it comes to VR mechanics, motion controls, UI, etc. It has a long way to go to get up to speed with industry standards. I really hope it pulls through though because it has a great, unique take on escape the room. I am only recommending it because of this and forgiving all the issues I expereinced while playing it because of early access.. Great game :). A really good game. When I played it, I immediately got a sense of Portal, Unravel and Stanley Parable. With logic puzzles like the first two, and comedic game that gets more serious at the end. It's a great game where you solve puzzles with logic and by thinking outside the box. The puzzles are hard enough to make you think, but isn't hard to the point to where I had to look up walkthroughs. (spoiler alert) The ending was great with the character breaking the fourth wall and making you feel guilty about playing a video game. I wish it was longer and I hope for a sequel!. Wow trying to win the scenario, Conquests of Alexander, on Deity within 37 turns is definitely extremely difficult, but if you can get the achievement, you'll be quite pleased with yourself! I can't believe I did it. Anyway, two more Civs in the game? Who could pass that up?
